The Volkswagen Beetle—officially the Volkswagen Type 1, informally in German the Käfer (meaning "beetle"), in parts of the English-speaking world the Bug, and known by many other nicknames in other languages—is a two-door, rear-engine economy car, intended for five occupants (later, Beetles were restricted to four people in some countries), that was manufactured and marketed by German ...

Volkswagen Beetle - Wikipedia

As the choke warms in concert with the warming engine, the butterfly valve in the throat of the carburetor opens and the Fast Idle Adjuster moves down the stepped cam, reducing the engine idle speed. Make sure that the choke is fully open and the Fast Idle Adjuster screw is resting on the very bottom of the stepped cam.
