The Fourth Edition of this unique casebook has been dramatically revised. This new edition presents the important cases, statutes, empirical data, and competing tort theories in a problems-oriented format that is designed to help students acquire a sophisticated understanding of tort law through active learning. As before, the text includes a large number of problems. Now, however, the Problems, updated and considerably expanded, are organized in Sets at the end of each substantive chapter. This extensively re-written and reorganized edition includes the classic common law torts cases, but is updated throughout with teachable, cutting-edge decisions that will demand student interest and hold their attention. Particular care has been to take account of the most recent commentaries on tort law, such as the growing importance of the Restatement (Third) of Torts. Chapter One is unique among American torts casebooks in its examination of how the dominant twenty-first century tort theories influence judicial decisionmaking and scholarship. That chapter explains six key perspectives on tort law. [] Law and Economics. [] Corrective Justice. [] Critical Race Theory. [] Critical Feminism. [] Pragmatism, and [] Social Justice. Chapter One references the famous McDonald's hot coffee litigation as a case study to illustrate these perspectives in action. Subsequent chapters continue to work through that case study and continually reference the perspectives to explain or challenge the decided cases. The authors seek to provide students with innovative cases and problems, empowering them with practical skills. By exposing students to the most important contemporary tort law theories, the Fourth Edition of this casebook encourages students to go beyond passively memorizing case holdings and the voyeuristic experience of reading appellate opinions and truly gain perspectives on tort law. This casebook raises interesting and challenging problems concerning the development of property law. Property concepts are introduced through cutting edge issues, such as intellectual property, rights of publicity, and ownership rights in the human body. Historical dimensions are presented through discussions of laws which formerly excluded certain individuals from most forms of ownership and property control, such as Native Americans, African Americans, and women. The text covers traditional topics: estates in land, landlord and tenant laws, transfers of property, private land use controls, and constitutional limitations on public land use controls. Most chapters are preceded by a concise summary of legal doctrines or common themes covered in the chapter. Explanatory Notes provide extensive explanations of cases and rules; they clarify complicated opinions with background information regarding the circumstances giving rise to the proceedings. Problems and Problem Notes take students beyond the realm of settled rules to generate analysis of the purpose behind the rules. This book also points students to relevant secondary sources for a broader understanding of property law. This eBook features links to Lexis Advance for further legal research options.
