Bangunan Gedung Baja Struktural sebagai revisi dari SNI 1729:2015 tentang Spesifikasi untuk Bangunan Baja Struktural. Pada Bab I, buku ini menjelaskan tentang dasar-dasar material baja, seperti sifat mekanis, karakteristik kekuatan baja, serta metode pengujian kekuatan baja. Konsep desain perencanaan struktur baja yang menggunakan Load and Resistance Factor Design (LRFD) dan Allowable Stress Design (ASD) dibahas pada Bab II. Selain membahas mengenai konsep desain, pada bab ini juga dibahas mengenai jenis-jenis beban serta kombinasi pembebanan yang digunakan pada perencanaan bangunan gedung. Pada Bab III mulai dibahas mengenai perencanaan struktur baja, dimulai dengan perencanaan batang tarik. Selanjutnya pada Bab IV dilanjutkan dengan pembahasan perencanaan batang tekan. Perencanaan sambungan baut dan sambungan las pada struktur baja dijelaskan pada Bab V dan Bab VI. Selain perencanaan komponen struktur batang tarik dan batang tekan, dijelaskan juga mengenai perencanaan struktur elemen lentur (balok) pada Bab VII. Perencanaan struktur baja pada portal yang menggunakan elemen balok kolom lebih lanjut dibahas pada Bab VIII.

A new edition of Francis D.K. Ching's illustrated guide to structural design Structures are an essential element of the building process, yet one of the most difficult concepts for architects to grasp. While structural engineers do the detailed consulting work for a project, architects should have enough knowledge of structural theory and analysis to design a building. Building Structures Illustrated takes a new approach to structural design, showing how structural systems of a building—such as an integrated assembly of elements with pattern, proportions, and scale—are related to the fundamental aspects of architectural design. The book features a one-stop guide to structural design in practice, a thorough treatment of structural design as part of the entire building process, and an overview of the historical development of architectural materials and structure. Illustrated throughout with Ching's signature line drawings, this new Second Edition is an ideal guide to structures for designers, builders, and students. Updated to include new information on building code compliance, additional learning resources, and a new glossary of terms Offers thorough coverage of formal and spatial composition, program fit, coordination with other building systems, code compliance, and much more Beautifully illustrated by the renowned Francis D.K. Ching Building Structures Illustrated, Second Edition is the ideal resource for students and professionals who want to make informed decisions on architectural design.
