If you wish to have your students write poetry as an assignment, it is necessary to have a rubric. Rubrics allow us to easily measure our students learning with impartiality. Indeed, since poetry is an extremely objective form of literature, it is difficult to grade without a general picture of how to measure the learning development of the students.

A gentle story that teaches how small acts of kindness can help children feel included and allow them to flourish, from esteemed author and speaker Trudy Ludwig and acclaimed illustrator Patrice Barton. A simple act of kindness can transform an invisible boy into a friend... Meet Brian, the invisible boy. Nobody in class ever seems to notice him or think to include him in their group, game, or birthday party . . . until, that is, a new kid comes to class. When Justin, the new boy, arrives, Brian is the first to make him feel welcome. And when Brian and Justin team up to work on a class project

An impassioned look at games and game design that offers the most ambitious framework for understanding them to date. As pop culture, games are as important as film or television—but game design has yet to develop a theoretical framework or critical vocabulary. In *Rules of Play* Katie Salen and Eric Zimmerman present a much-needed primer for this emerging field. They offer a unified model for looking at all kinds of games, from board games and sports to computer and video games. As active participants in game culture, the authors have written *Rules of Play* as a catalyst for

innovation, filled with new concepts, strategies, and methodologies for creating and understanding games. Building an aesthetics of interactive systems, Salen and Zimmerman define core concepts like "play," "design," and "interactivity." They look at games through a series of eighteen "game design schemas," or conceptual frameworks, including games as systems of emergence and information, as contexts for social play, as a storytelling medium, and as sites of cultural resistance. Written for game scholars, game developers, and interactive designers, Rules of Play is a textbook, reference book, and theoretical guide. It is the first comprehensive attempt to establish a solid theoretical framework for the emerging discipline of game design.

In this important book, education expert Kim Marshall shows how to break away from the typical and often ineffective evaluation approaches in which principals use infrequent classroom visits or rely on standardized test scores to assess a teacher's performance. Marshall proposes a broader framework for supervision and evaluation that enlists teachers in improving the performance of all students. Emphasizing trust-building and teamwork, Marshall's innovative, four-part framework shifts the focus from periodically evaluating teaching to continuously analyzing learning. This book offers school principals a guide for implementing Marshall's framework and shows how to make frequent, informal classroom visits followed by candid feedback to each teacher; work with teacher teams to plan thoughtful curriculum units rather than focusing on individual lessons; get teachers as teams involved in low-stakes analysis of interim assessment results to fine-tune their teaching and help struggling students; and use compact rubrics for summative teacher evaluation. This vital resource also includes extensive tools and advice for managing time as well as ideas for using

"Teaching is art-creation-and a curriculum map is only as good as the teacher who considers it, who questions it, and who revises it to meet the needs of each year's students."

-Kelly Gallagher and Penny Kittle Two teachers. Two classrooms. One school year. 180 Days represents the collaboration of two master teachers-Kelly Gallagher and Penny Kittle-over an entire school year: planning, teaching, and reflecting within their own and each other's classrooms in California and New Hampshire. Inspired by a teacher's question, "How do you fit it all in?" they identified and prioritized the daily, essential, belief-based practices that are worth spending time on. They asked, "Who will these students be as readers and writers after a year under our care?" What we make time for matters: what we plan, how we revise our plans while teaching, and how we reflect and decide what's next. The decision-making in the moment is the most essential work of teaching, and it's the ongoing study of the adolescents in front of us that has the greatest impact on our thinking. With both the demands of time and the complexity of diverse students in mind, Kelly and Penny mapped out a year of engaging literacy practices aligned to their core beliefs about what matters most. They share their insights on managing time and tasks and offer teaching strategies for engaging students in both whole class and independent work. Video clips of Kelly and Penny teaching in each other's classrooms bring this year to life and show you what a steadfast commitment to belief-based instruction looks like in action. 180 Days. Make every moment matter. Teach fearlessly. Empower all students to live literate lives.

'A landmark in the process of decolonizing imperial Western knowledge.' Walter D. Mignolo, Duke University To the colonized, the term 'research' is conflated with European colonialism; the ways in which academic research has been implicated in the throes of imperialism remains a painful memory. This essential volume explores intersections of imperialism and research - specifically, the ways in which imperialism is embedded in disciplines of knowledge and tradition as 'regimes of truth.' Concepts such as 'discovery' and 'claiming' are discussed and an argument presented that the decolonization of research methods will help to reclaim control over indigenous ways of knowing and being. Now in its eagerly awaited second edition, this bestselling book has been substantially revised, with new case-studies and examples and important additions on new indigenous literature, the role of research in indigenous struggles for social justice, which brings this essential volume urgently up-to-date.

In this comprehensive response to the education crisis, the author of *Teaching as a Subversive Activity* returns to the subject that established his reputation as one of our most insightful social critics. Postman presents useful models with which schools can restore a sense of purpose, tolerance, and a respect for learning.
