and request the resources needed to run jobs. The document also contains a chapter that describes "started tasks" and how to set them up.

IBM z/OS MVS JCL
Reference

(SA23-1385-30)

Job control language
(JCL) is a set of

Acces PDF Jcl Manuals

statements that you code to tell the z/OS[®] operating system about the work you want it to perform.

Although this set of statements is quite large, most jobs can be run using a very small subset. Learn about essential and most frequently used JCL statements and parameters, as well

Acces PDF Jcl Manuals

as coding techniques.
