Examines the ten leadership skills that will be necessary to succeed in the future, including bio-empathy, rapid prototyping, and commons creation.

NEW EDITION, REVISED AND UPDATEDWhat are the new leadership skills needed to succeed in the decade ahead? In this second edition Bob Johansen, bestselling author and longtime CEO of the Institute for the Future, teams with the prestigious Center for Creative Leadership (CCL), not only describing and updating the 10 new essential leadership skills but also offering tools and techniques for developing and applying them.

We are in a time of accelerating disruptive change. In a VUCA world - one characterized by volatility, uncertainty, complexity, and ambiguity - traditional leadership skills won't be enough, noted futurist Bob Johansen argues. Drawing on the latest forecasts from the Institute for the Future - the first futures think tank ever to outlive its forecasts - this powerful book explores the external forces that are shaking the foundations of leadership and unveils ten critical new leadership skills. How adroit are you at dilemma flipping - turning problems that can't be solved into opportunities? Can you develop bio - empathy - the ability to learn from and apply the principles of nature in your leadership? Are you able to practice immersive learning - dive into very different - from - you physical and online worlds and learn from them? Johansen provides role models, tools, and advice to help you develop these and seven other future leadership skills. In addition, Johansen deals with two new forces that are shaping the future. The first is the "digital natives" - people fifteen years and younger who have grown up in a digital world. The second is cloud - based supercomputing, which will enable extraordinarily rich new forms of connection, collaboration, and commerce. In this thoroughly updated and expanded second edition, Johansen is joined by the prestigious Center for Creative Leadership. CCL's contributions help readers understand the new leadership skills by linking them to existing skills, and they provide analytics and exercises so readers can more fully develop these new skills.

We are in a time of accelerating disruptive change. In a VUCA world - one characterized by volatility, uncertainty, complexity, and ambiguity - traditional leadership skills won't be enough, noted futurist Bob Johansen argues. Drawing on the latest forecasts from the Institute for the Future - the first futures think tank ever to outlive its forecasts - this powerful book explores the external forces that are shaking the foundations of leadership and unveils ten critical new leadership skills. How adroit are you at dilemma flipping - turning problems that can't be solved into opportunities? CCL's contributions help readers understand the new leadership skills by linking them to existing skills, and they provide analytics and exercises so readers can more fully develop these new skills.

Over the next decade, today's connected world will be explosively more connected. Anything that can be distributed will be distributed: workforces, organizations, supply webs, and more. The tired practices of centralized organizations will become brittle in a future where authority is radically decentralized. Rigid hierarchies will give way to liquid structures. Most leaders—and most organizations—aren't ready for this future. Are you? It's too late to catch up, but it's a great time to leapfrog. Noted futurist Bob Johansen goes beyond skills and competencies to propose five new leadership literacies—combinations of disciplines, practices, and worldviews—that will be needed to thrive in a VUCA world of increasing volatility, uncertainty, complexity, and ambiguity. This book shows how to (1) forecast likely futures so you can "look back" and make sure you're prepared now for the changes to come, (2) use low-risk gaming spaces to work through your concerns about the future and hone your leadership skills, (3) lead shape-shifting organizations where you can't just tell people what to do, (4) be a dynamic presence even when you're not there in person, and (5) keep your personal energy high and transmit that energy throughout your organization. This visionary book provides a vivid description of the ideal talent profile for future leaders. It is written for current, rising star, and aspiring leaders; talent scouts searching for leaders; and executive coaches seeking a fresh view of how leaders will need to prepare. To get ready for this future, we will all need new leadership literacies.

Leading futurist Bob Johansen shows how a new way of thinking, enhanced by new technologies, will help leaders break free of limiting labels and see new gradients of possibility in a chaotic world. The future will get even more perplexing over the next decade, and we are not ready. The dilemma is that we're restricted by rigid categorical thinking that freezes people and organizations in neatly defined boxes that often are inaccurate or obsolete. Categories lead us toward certainty but away from clarity, and categorical thinking moves us away from understanding the bigger picture. Sticking with this old way of thinking and seeing isn't just foolish, it's dangerous. Full-spectrum thinking is the ability to seek patterns and clarity outside, across, beyond, or maybe even without any boxes or categories while resisting false certainty and simplistic binary choices. It reveals our commonalities that are hidden in plain view. Bob Johansen lays out the core concepts of full-spectrum thinking and reveals the role that digital media—including gameful engagement, big-data analytics, visualization, blockchain, and machine learning—will play in facilitating and enhancing it. He offers examples of broader spectrums and new applications in a wide range of areas that will become possible first, then mandatory. This visionary book provides powerful ways to make sense of new opportunities and see the world as it really is.

Although leadership is the hot topic on conference agendas and book tours, most people who find themselves in positions of leadership have little or no training for the role. They simply continue to make the same old mistakes. With additional and newly updated material, this leadership classic reveals the most common errors that leaders consistently make-regardless of training or age-and the way to stop these bad habits from undermining their positive talents and accomplishments. Whether you are leading a company, a ministry, a Girl Scout troop, or your family, The Top Ten Mistakes Leaders Make is a must-read for anyone who wants to lead others effectively. "If you're like me, you've grown weary of the published cookie-cutter approaches on how to lead effectively. And so has Hans Finzel. He drills to the core of the current issues on effective leadership.?" Charles R. Swindoll, author and president of Dallas Theological Seminary "This is one of the most practical books on leadership I have in my own library. If you are serious about becoming a better leader, you will want to read this book.?" -John C. Maxwell, author, speaker, and founder of the INJOY Group

These days, every leader struggles with a paradox: you can't predict the future, but you have to be able to make sense of it to thrive. In the age of the Internet, everyone knows what's new, but to succeed you have to be able to sort out what's important, devise strategies based on your own point of view, and get there ahead of the crowd. Bob Johansen shares techniques the Institute for the Future has been refining for nearly forty years to help leaders navigate what, borrowing a term from the Army War College, he calls the VUCA world: a world characterized by volatility, uncertainty, complexity, and ambiguity. As the institute's ten-year forecast makes clear, leaders now face fewer problems with neat solutions and more dilemmas: recurring, complex, messy, and puzzling situations. Get There Early lays out the institute's three-step Foresight to Insight to Action Cycle that will allow readers to sense, make sense of, and win with dilemmas. Johansen offers specific techniques, ranging from storytelling to simulation gaming, as well as real-world examples to help readers turn the VUCA world on its head through creative use of vision, understanding, clarity, and agility. This book offers hope for leaders facing the constant tension—a dilemma in itself—between judging too soon and deciding too late.

First Published in 2003. Routledge is an imprint of Taylor & Francis, an informa company.

Are you a future-ready leader? Based on exclusive interviews with over 140 of the world's top CEOs and a survey of nearly 14,000 people. Do you have the right mindsets and skills to be able to lead effectively in the next ten years and beyond? Most individuals and organizations don't even know what leadership will look like in the future. Until now. There has been a lot written about leadership for the present day, but the world is changing quickly. What worked in the past won't work in the future. We need to know how to prepare leaders who can successfully navigate and guide us through the next decade and beyond. How is leadership changing, and why? How ready are leaders today for these changes? What should leaders do now? To answer these questions, Jacob interviewed over 140 CEOs from companies like Unilever, Mastercard, Best Buy, Oracle, Verizon, Kaiser, KPMG, Intercontinental Hotels Group, Yum! Brands, Saint-Gobain, Dominos, Philip Morris International, and over a hundred others. Jacob also partnered with LinkedIn to survey almost 14,000 of their members around the globe to see how CEO insights align with employee perspectives The majority of the world's top business leaders that Jacob interviewed believe that while some core aspects of leadership will remain the same, such as creating a vision and executing on strategy, leaders of the future will need a new arsenal of skills and mindsets to succeed. What emerged from all of this research is the most accurate groundbreaking book on the future of leadership, which shares exclusive insights from the world's top CEOs and never before seen research. After reading it, you will: Learn the greatest trends impacting the future of leadership and their implications Understand the top skills and mindsets that leaders of the future will need to possess and how to learn them Change your perception of who a leader is and what leadership means Tackle the greatest challenges that leaders of the future will face See the gap that exists between what CEOs identified versus what employees are actually experiencing Become a future-ready leader This is the book that you, your team, and your organization must read in order to lead in the future of work.
