Maintaining the proven methodology
and pedagogy of the Beer and
Johnson series, Statics and Mechanics
of Materials combines the theory and
application behind these two subjects
into one cohesive text focusing on
teaching students to analyze problems
in a simple and logical manner and,
then, to use fundamental and well-
understood principles in the solution.

The resultant of the internal forces for
an axially loaded member is normal to
a section cut perpendicular to the
member axis. The force intensity on
that section is defined as the normal
stress. Beer and Johnston's Mechanics
of Materials is the uncontested leader
for the teaching of solid mechanics.
