This fascinating addition to the best-selling Who Was...? series does not settle questions of theology. Instead, it presents young readers with a biography that covers what is known historically about Jesus and places in his life in the context of his world when Jerusalem was part of the Roman Empire. In an even-handed and easy-to-read narrative, this title—illustrated with eighty black-and-white drawings—also explains the early origins of Christianity and how it became a major religion.

The main problems faced by scientists in working with Big Data sets, highlighting the main ethical issues, taking into account the legislation of the European Union. After a brief Introduction to Big Data, the Technology section presents specific research applications. There is an approach to the main philosophical issues in Philosophical Aspects, and Legal Aspects with specific ethical issues in the EU Regulation on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (Data Protection Directive - General Data Protection Regulation, "GDPR"). The Ethics Issues section details the specific aspects of Big Data. After a brief section of Big Data Research, I finalize my work with the presentation of Conclusions on research ethics in working with Big Data. CONTENTS: Abstract 1. Introduction - 1.1 Definitions - 1.2 Big Data dimensions 2. Technology - 2.1 Applications - - 2.1.1 In research 3. Philosophical aspects 4. Legal aspects - 4.1 GDPR - - Stages of processing of personal data - - Principles of data processing - - Privacy policy and transparency - - Purposes of data processing - - Design and implicit confidentiality - - The (legal) paradox of Big Data 5. Ethical issues - Ethics in research - Awareness - Consent - Control - Transparency - Trust - Ownership - Surveillance and security - Digital identity - Tailored reality - De-identification - Digital inequality - Privacy 6. Big Data research Conclusions Bibliography DOI: 10.13140/RG.2.2.11054.46401

Even though he is very slow and has many distractions on the way, Franklin the turtle manages to get to Bear's house just in time for a special event.

Sequel to Transylvania Sunrise wherein Radu Cinamar meets the Tibetan lama who orchestrated the discovery of ancient technology under the Romanian Sphinx

There are many myths about serial killers: that they are all dysfunctional loners; all white males; only motivated by sex; that they all travel

## Read Free Probleme De Informatica Rezolvate Solomonhalita

and operate across a wide area; cannot stop killing; are all insane, or evil geniuses; and that they all want to get caught. Of course, there are some serial killers who fit into these categories, but the married Green River Killer was not a dysfunctional loner; there are plenty of female and non-Caucasian serial killers; Dr Harold Shipman was certainly not motivated by sex; many serial killings (such as the Ipswich prostitute murders carried out by Steve Wright) happen within a confined area; the 'BTK Killer', Dennis Rader, stopped killing in 1991, but wasn't caught until fourteen years later. Many serial killers may have a low animal cunning, or be 'street smart', but few of them are Mensa-level geniuses. Each of the thirty cases covered here is unusual in some respect, perhaps in the way in which the killer carried out their crimes, the choice of victims, the way in which they were apprehended, or the method of their execution. The cases are presented alphabetically by country - from Australia via Colombia, Great Britain, Indonesia, Iran, South Africa and elsewhere to the United States - and then chronologically. They come from across history and from all over the world. The author has gone back as far as possible to contemporary source material - newspaper accounts, trial evidence, interviews with perpetrators or survivors - rather than rely on the increasingly blurred truth to be found online and in far too many collections.

This book is designed as a laboratory manual for a college-level introductory Animal Science course. It includes 15 chapters, each devoted to a different species or facet of animal production. Each chapter contains hands-on activities related to that topic.

At Fox's house, all of Franklin's friends share funny stories that help the little turtle overcome his fear of thunder and lightning.

**\*\*New Adult Romance\*\*** Needing an escape from her past, Avery chooses a college where no one knows her. Keeping a low profile was the plan, falling for the intense frat boy, Jase wasn't. Yet she can't deny how alive she feels when he's near. Even as common sense implores her to stay away, her body begs her to get closer. Jase, numb from his own family drama, has grown bored with weekends fueled by nameless girls and countless bottles when he meets Avery. Helping her cope with her past is better than dealing with the bullshit his own life's served up. Determined to drive away the painful secret she's guarding, he appoints himself her life coach, and challenges her to new experiences. Getting close to her and being the one to make her smile are simply perks of the job. But when Avery's past boldly saunters in, refusing to be forgotten, can Jase live with the truth about the girl he's fallen for? Recommended for 17+ due to mature themes and sexual content.
