exercises, Making Connections exercises, Exercises in Critical Appraisal, and Going Beyond exercises to promote in-depth learning for a variety of learning styles. Answer key allows you to check your understanding and learn from your mistakes (formative assessment). Quick-reference printed tabs have been added to differentiate the answer key and each of the book's three published studies appendices (four tabs total) for improved navigation and usability. Learning activities for each textbook chapter reinforce key concepts and guide you in application to evidence-based clinical practice. NEW! Increased emphasis on evidence-based practice corresponding to the EBP emphasis in the text to help you see the value of understanding the research process and apply it to evidence-based nursing practice. NEW! Hands-on practice with three current, high-quality published studies to help you better understand the research and evidence-based practice processes and help you learn to appraise and apply research findings to clinical settings. NEW! Enhanced key terms activities compensate for the deletion of the key terms lists from the textbook that are now addressed in Study Guide activities. NEW! New Appraisal Guidelines help you to critically appraise research articles. NEW! Updated full-text articles ensure that the examples provided reflect the most current, high-quality studies that are meaningful.

An overview of the evolution of nursing research with real world examples. For undergraduate students who are learning the steps of the research process, learning how to critique published research literature and learning when and how to apply research findings in clinical practice.

This leading textbook of nursing research, written by two of the most renowned experts in the field, is now published in full-colour, and this, the 4th edition has now been updated throughout to reflect today's evidence-based practice.

The Sixth Edition of this classic text maintains its place as the "Gold Standard" of nursing research. Nationally and internationally known, respected and used, the text provides readers with the skills they need to design and implement a research investigation and critically evaluate published research reports. Now completely revised and updated to reflect the latest trends in quantitative and qualitative research, this essential guide offers a focused, "how-to" approach. New in this edition: expanded discussion of qualitative approaches; demonstration of qualitative and quantitative approaches working together; charts and tables offer description of qualitative approaches; stronger emphasis on the "hands-on, how-to" methodology; more in-depth examination of research difference; research more powerful research utilization.

Community & Public Health Nursing is designed to provide students a basic

grounding in public health nursing principles while emphasizing aggregate-level nursing. While weaving in meaningful examples from practice throughout the text, the authors coach students on how to navigate between conceptualizing about a population-focus while also continuing to advocate and care for individuals, families, and aggregates. This student-friendly, highly illustrated text engages students, and by doing so, eases students into readily applying public health principles along with evidence-based practice, nursing science, and skills that promote health, prevent disease, as well as protect at-risk populations! What the 8th edition of this text does best is assist students in broadening the base of their knowledge and skills that they can employ in both the community and acute care settings, while the newly enhanced ancillary resources offers interactive tools that allow students of all learning styles to master public health nursing.

This easy-to-understand textbook offers a comprehensive introduction to nursing research concepts and methods. Evidence-based practice is emphasised throughout, with clear guidelines for evaluating research and applying scientific evidence to practice. Coverage includes qualitative and quantitative research, appraising and critiquing research, critical thinking, and clinical decision-making using research information.
